SMS	Short Messaging Service
TEAMS	The East African Marine System
PEACE	Pakistan & East Africa Connecting Europe
VoIP	Voice over Internet Protocol
FM	Frequency Modulation
3G	Third Generation
4G	Fourth Generation
5G	Fifth Generation
DDOS	Distributed Denial of Service
OTT	Over-The-Top media services

## PRELIMINARY NOTES

This report is based on data provided by licensees in the ICT sector as per their license conditions and obligations. The information provided herein is subject to review during the subsequent quarter in case of any revisions or updates from the licensees.

This report has been prepared in line with best practice and adheres to International Telecommunications Union (ITU) standards on collection of administrative/supply side data on telecommunications/Information and Communications Technologies [https://www.itu.int/en/ITU-D/Statistics/Documents/publications/handbook/2020/ITUHandbookTelecomAdminData2020\\_E\\_rev1.pdf](https://www.itu.int/en/ITU-D/Statistics/Documents/publications/handbook/2020/ITUHandbookTelecomAdminData2020_E_rev1.pdf) and also the guiding manual available on our website <https://www.ca.go.ke/reports-and-studies?page=2> . These manuals provide clarity on how the various indicators are defined, methodologies for data collection, scope of the indicators, and any limitations that may be related to the specific indicators.

The main objective of the report is to measure and monitor availability and accessibility of ICT services by Kenyans from the supply perspective. It is key to note that this report **does not include demand side data** (data on usage/uptake of ICTs from the consumer perspective) as this information is collected through National ICT Surveys and reported separately as per ITU standards

[https://www.itu.int/en/ITU-D/Statistics/Documents/publications/manual/ITUManualHouseholds2020\\_E.pdf](https://www.itu.int/en/ITU-D/Statistics/Documents/publications/manual/ITUManualHouseholds2020_E.pdf). The Authority collaborates with the Kenyan National Bureau of Statistics (KNBS) to collect the demand side data through National Surveys.

## SUMMARY OF ICT INDICATORS

The Third Quarter Sector Statistics Report provides the performance and trends in the ICT sector for the period 1<sup>st</sup> January to 31<sup>st</sup> March 2024 in:

1. Mobile Network services
2. Fixed Network services
3. Courier services
4. Broadcasting services
5. Frequency spectrum management
6. Electronic transactions and Cyberspace management

Indicator/Period		Q3(Jan-Mar 24)	Q2(Oct-Dec 23)	Quarterly Variation (%)
<b>MOBILE NETWORK SERVICES</b>				
<b>Subscriptions to Mobile Services</b>	Total Mobile (SIM) Subscriptions	68,046,393	66,745,709	1.9
	Machine-to-Machine (M2M) Subscriptions	1,607,536	1,515,338	6.1
<b>Mobile Money Transfer Services</b>	Number of Registered Mobile Money Agents	339,282	327,162	3.7

# 1. MOBILE NETWORK SERVICES

## 1.1 Active<sup>1</sup> Mobile (SIM) Subscriptions and Penetration Rate

The number of active mobile (SIM) subscriptions increased to 68.0 million by end of March 2024 from 66.7 million subscriptions recorded by end of December 2023, translating to a penetration rate of 132.1 percent. The growth is attributed to customer win back campaigns run during the reference period.

Source: CA, Operators' Returns

Figure 1: Mobile Subscriptions and Penetration

The number of active mobile (SIM) subscriptions per operator by contract type is as shown in Figure 2.

<sup>1</sup> Active mobile (SIM) subscription refers to any subscription that has generated revenue in the last 3 months (90 days)

Operator/Indicator	Total	Prepaid	Postpaid
Total Subscriptions	68,048,393	66,770,909	1,275,484
Safaricom PLC	44,666,368	43,529,938	1,136,430
Airtel Networks Ltd	19,858,255	19,730,013	128,242
Telkom Kenya Ltd	1,478,668	1,467,856	10,812
Finserve (Equitel)	1,497,283	1,497,283	
Jamii Telecommunications	545,819	545,819	

Source: CA, Operators' Returns

Figure 2: Mobile Subscriptions per Operator

### 1.2 Machine-to-Machine (M2M<sup>2</sup>) Subscriptions

Machine-to-Machine (M2M) subscriptions rose to 1.607 million from 1.515 million recorded last quarter as shown in Figure 3.

<sup>2</sup> **Machine to Machine mobile-network subscriptions (M2M subscriptions)** refer to the number of mobile cellular machine-to-machine subscriptions that are assigned for use in machines and devices (cars, smart meters, consumer electronics) for the exchange of data between networked devices, and are not part of a consumer subscription. For instance, SIM cards in personal navigation devices, smart meters, trains and automobiles are included while mobile dongles and tablet subscriptions are excluded. Only active subscriptions are counted.

Source: CA, Operators' Returns. \*Provisional Data for Telkom Kenya Limited

Figure 3: M2M Subscriptions

### 1.3 Mobile Money Services

During the reference period, mobile money subscriptions grew to 38.7 million translating to a penetration rate of 75.0 percent. Although there was growth in subscriptions, the penetration rate dropped due to review of the denominator on population following the release of the 2024 Economic Survey. The growth in mobile money is attributed to the removal of withdrawal codes for transactions sent from M-Pesa to Airtel Money, which means that funds can now be transferred directly into the Airtel Money account (wallet).

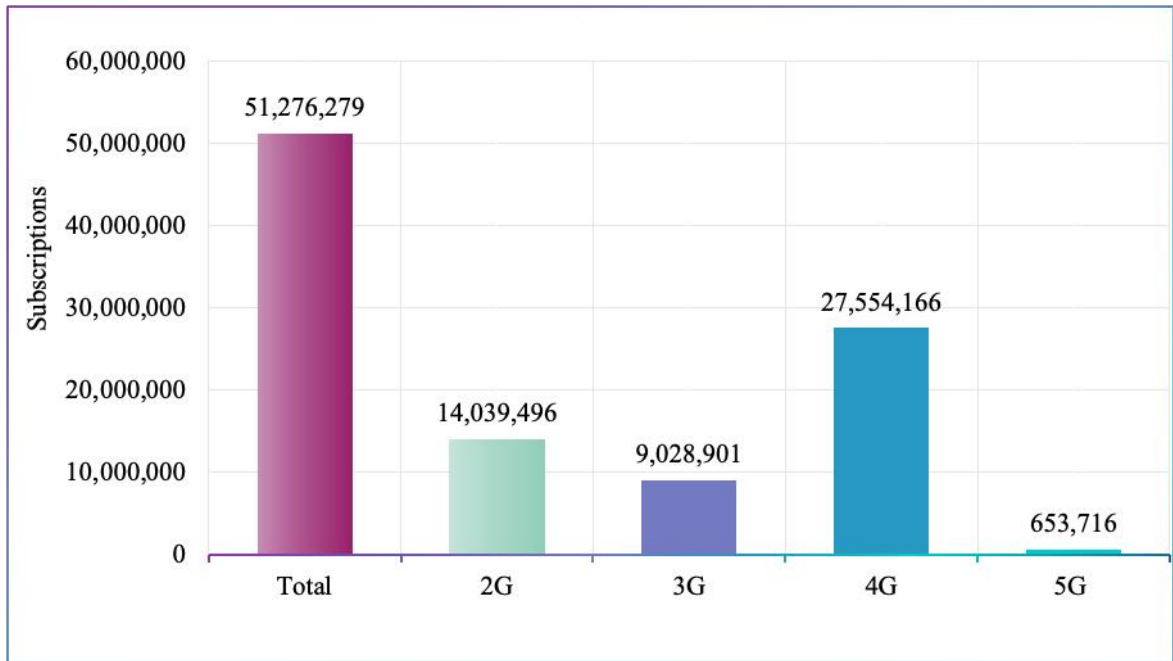

Source: CA, Operators' Returns

Figure 4: Mobile Money Services

## 1.4 Mobile Data and Broadband<sup>3</sup> Services

The total mobile data subscriptions stood at 51.3 million out of which 72.6 percent were on mobile broadband as shown in Figure 5. Figure 6 shows mobile broadband subscriptions by technology with their respective data volumes consumed and the average data consumption per subscriptions.

Source: CA, Operators' Returns

Figure 5: Mobile Data and Broadband Subscriptions

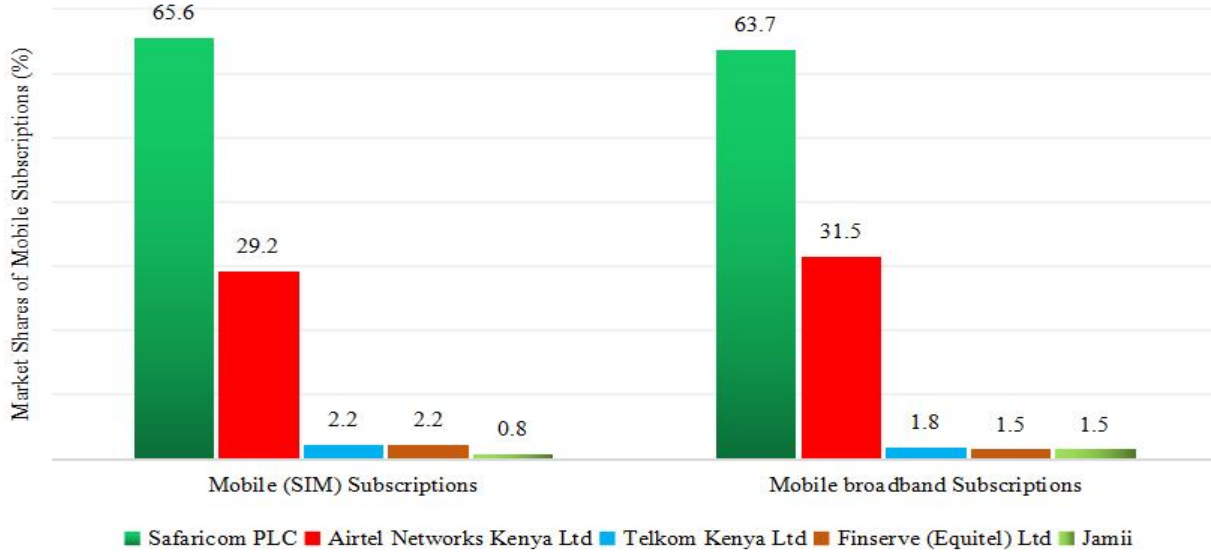

Source: CA, Operators' Returns

Figure 6: Mobile Broadband Subscription and Consumption

<sup>3</sup> **Mobile broadband** includes 3G, 4G and 5G. Broadband refers to connectivity that delivers interactive, secure, quality and affordable services at a minimum speed of 2Mbps (The National Broadband Strategy 2018-2023)

### 1.5 Market Shares in Subscriptions for Mobile Services

### Mobile Money Subscriptions

Source: CA, Operators' Returns

Figure 7: Mobile Market Shares

The total number of mobile phone devices connected to mobile networks was 65.7 million with a penetration rate of 127.5 percent. Figure 8 shows the number of smartphones and feature phones connected to mobile networks with their respective penetration rates.

Source: CA' Operators Returns

Figure 8 Mobile Phone Devices

### 1.7 Domestic Mobile Voice Traffic (Minutes)

The volume of outgoing domestic voice traffic grew from 23.6 billion reported last quarter to 25.2 billion in the reference period. The growth is attributed to the offers and promotions run by the service providers during the referenced period some of which customers were able to make 15 minutes call within 30 minutes from the time of purchase for as low as KES 5.

Table 1: Domestic Voice Traffic (Minutes)

Indicator/Period	Jan-Mar 24	Oct-Dec 23	Quarterly Variation (%)
<b>Total Outgoing Traffic</b>	<b>25,185,517,287</b>	<b>23,582,017,151</b>	<b>6.8</b>
On-net (Own Network – Own Network)	21,629,564,931	20,228,439,918	6.9
Off-net (Own Network to Other Mobile Networks)	3,539,870,480	3,338,856,198	6.0
Mobile Network to Fixed Network	16,081,876	14,721,036	9.2

Source: CA, Operators' Returns

### 1.8 Minutes of Use per Call per Operator

In quarter three, the total average minutes per on-net calls remained unchanged at 1.8 minutes whereas that of off-net calls grew to 1.2 minutes from 1.1 minutes recorded in quarter two. Consumers on Airtel Networks spent more time on a single on-net call averaging 2.9 minutes from 2.8 minutes posted in the preceding quarter. Further, Safaricom PLC, Equitel and Jamii customers recorded the highest average Minutes of Use per off net call at 1.3.

Table 2: MoU per Call per Operator

<b>Period</b>	<b>Jan-Mar 24</b>		<b>Oct-Dec 23</b>	
<b>Operator/Indicator</b>	<b>On-net</b>	<b>Off-net</b>	<b>On-net</b>	<b>Off-net</b>
<b>Total Average</b>	<b>1.8</b>	<b>1.2</b>	<b>1.8</b>	<b>1.1</b>

<i>Airtel Networks Limited</i>	2.9	1.1	2.8	1.1
<i>Telkom Kenya Limited</i>	1.3	1.2	1.2	1.2
<i>Finserve (Equitel)</i>	2.1	1.3	2.2	1.3
<i>Jamii Telecommunications Ltd</i>	0.1	1.3	0.1	1.3

Source: CA, Operators' Returns

### 1.9 Domestic Mobile SMS Traffic

There was a general decline in On-net and Off-net mobile SMS dropping by 4.7 percent and 5.3 percent to record 11.8 billion and 1.6 billion messages, respectively. This drop is attributed to the end of the long school holiday coupled with the conclusion of the festive season.

Table 3: Domestic Mobile SMS Traffic

<b>Indicator/Period</b>	<b>Jan-Mar 24</b>	<b>Oct-Dec 23</b>	<b>Quarterly Variation (%)</b>
<b>Total SMS Traffic</b>	<b>13,425,388,898</b>	<b>14,100,989,714</b>	<b>-4.8</b>
<b>On-net (Own Network – Own Network)</b>	11,812,948,311	12,398,385,950	-4.7

Source: CA, Operators' Returns

## 1.11 Market shares in Domestic Mobile Voice and SMS Traffic

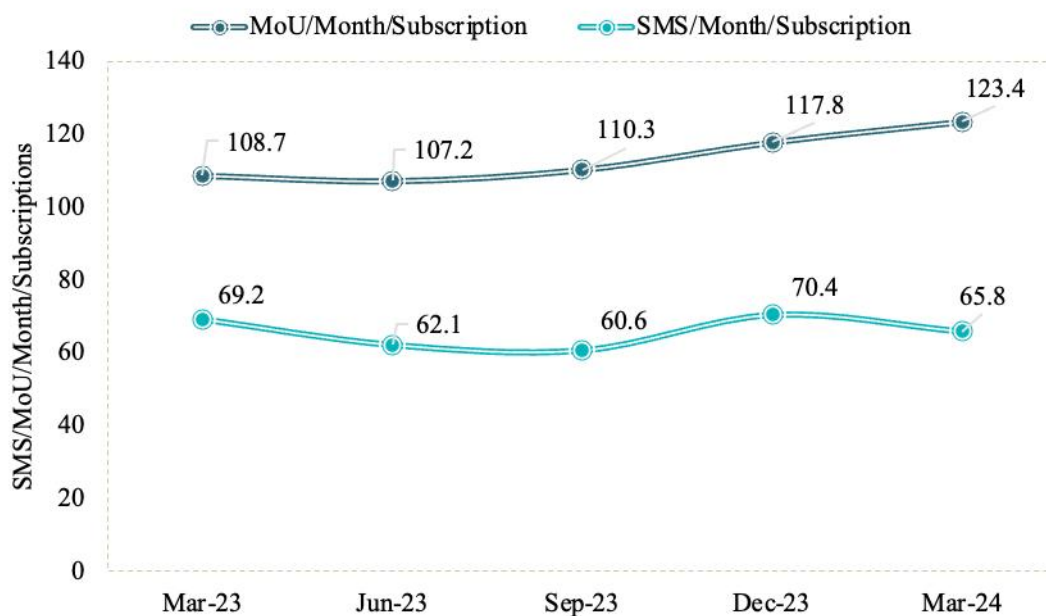

Source: CA, Operators' Returns

Figure 9: Market Shares in Domestic Mobile Voice and SMS

## 1.12 Minutes/Month/Subscription vs SMS/Month/Subscription

The Minutes of Use (MoU) per Month per Subscription grew during the reference period to post 123.4 minutes from 117.8 minutes reported last quarter. This growth is attributed to the general increase in mobile voice traffic during the quarter. On the other hand, short messages sent (SMS) per month per subscription dropped to 65.8 messages during the period under review from 70.4 messages reported in preceding quarter owing to the general decline in SMS during the period.

Source: CA, Operators' Returns

Figure 10: MoU/Month/Subscription vs SMS/Month/Subscription

## 1.13 International Mobile Traffic

During the reference period, international incoming and outgoing mobile voice traffic rose by 24.0 percent and 4.0 percent to 113.59 million minutes and 189 million minutes respectively. The international incoming mobile SMS dropped to stand at 9.12 million whereas outgoing mobile SMS rose to post 4.20 million as shown in Table 5.

Table 5: International Mobile Traffic

Indicator/Period	Region	Jan-Mar 24	Oct-Dec 23	Quarterly Variation (%)
International Incoming Mobile Voice Minutes	EAC	86,651,182	71,579,076	21.1
	Others	26,942,329	20,010,363	34.6

## 2.6 International Bandwidth

The total available International Internet bandwidth capacity in the country grew by 20.0 per cent to 20,744.338 Gbps. This is attributed to the upgrade of the capacity during the reference period. The total utilized undersea bandwidth capacity grew by 1.5 per cent to 11,155.154 Gbps, out of which 8,201.334 Gbps were used in the country and 2,953.820 Gbps were sold outside the country, as shown in Table 13. The utilized satellite capacity increased remarkably following the launch of Starlink’s high-speed, low-latency satellite Internet in the country.

Table 13: International Internet Bandwidth (Gbps)

<b>Indicator/ Period</b>	<b>Jan-Mar 24</b>		<b>Oct-Dec 23</b>		<b>Quarterly Variation (%)</b>

### 3. COURIER SERVICES

#### 3.1 Private Operator Traffic

During the reference period, local outgoing letters and parcels grew by 29.5 percent and 23.8 percent to post 373,293 letters and 1,797,398 parcels, respectively. However, international outgoing letters declined from 405,398 letters posted in the previous quarter to 263,522 letters in the quarter the third quarter. Additionally, international incoming letters dropped by 21.8 percent to 86,227 letters during the quarter under review.

Table 14: Courier Items

<b>Indicator/Period</b>	<b>Jan-Mar 24</b>	<b>Oct-Dec 23</b>	<b>Quarterly Variation (%)</b>
<b>Outgoing Domestic Letters</b>	373,293	288,233	29.5
<b>Outgoing Domestic Courier Items</b>	1,797,398	1,451,307	23.8

## 7 CONCLUSION

During the referenced period, consumers of mobile voice services in the country benefited from various promotions and special offers run by the operators resulting to an increase in mobile voice traffic. Similarly, there was growth in mobile money following the removal of withdrawal codes for transactions sent from M-Pesa to Airtel Money making it possible to transfer funds directly between the two mobile wallets. The launch of Starlink’s Internet services in the country played a major role in driving the uptake of broadband services. Generally, the sector is expected to keep growing following the roll out of new technologies and services.
